

FOAM MATTRESSES

Our mattresses are made in New Zealand using polyurethane foam and they have polyester covers. There are two densities available:

- **Standard:** Made of light/soft SSM5 foam. It is easy to transport by folding or rolling which makes it ideal for marae bedding, camping, caravans, vans, holiday homes, children's beds, spare beds or for occasional use.
- **Premium heavy duty:** Made of heavy/firm FHB5 which is more suitable for every night use and applications where it will be used for seating and sleeping like a caravan seat or a bed.
